

*Lighting Control Made Easy*

**CLIPSAL**<sup>®</sup>  
INTEGRATED SYSTEMS

**C-Bus**  
**WIRELESS**  
The 240Volt Wireless Control System

2 Wires  
240 Volts  
2 Easy!

- Installs just like a normal light switch
- 2-way, 3-way or more switching
- Built-in dimmer or relay
- Set lighting scenes
- Operate by remote control
- Control lamps and appliances using plug adaptors

[clipsal.com/cis](http://clipsal.com/cis)

What is it?

## C-Bus Wireless is a 240V Wireless Control System that uses the same wires as a normal light switch.

You can now simply pull out the old light switch and put in a new C-Bus Wireless one using the same active and switched active. You don't even need a neutral! In fact, you can even use it as a stand-alone unit, which is great for customers who like the look of Neo or glass Ultri Saturn switches. But it doesn't stop there. You can set up 2-way switching between any switch! Add some plug adaptors and you can dim lamps or control appliances too.

**It's that easy.**

### Great looking switches

Colours and styles to suit any decor.

### Labelled for convenience

Label buttons so you know what each one does.

### Plug Adaptors

Control lamps, appliances and more!

### Remote

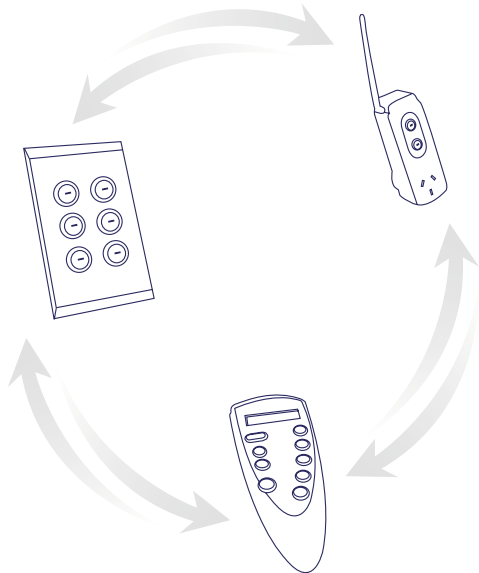

Total control from the comfort of your chair.

# How does it work?

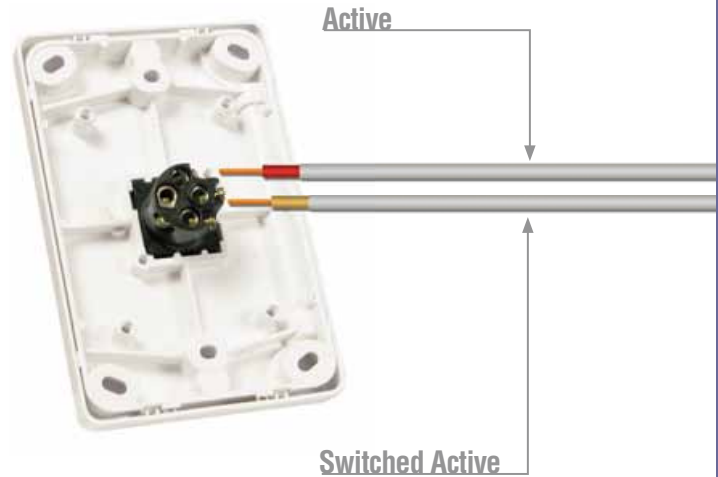

## Switches that talk to each other.

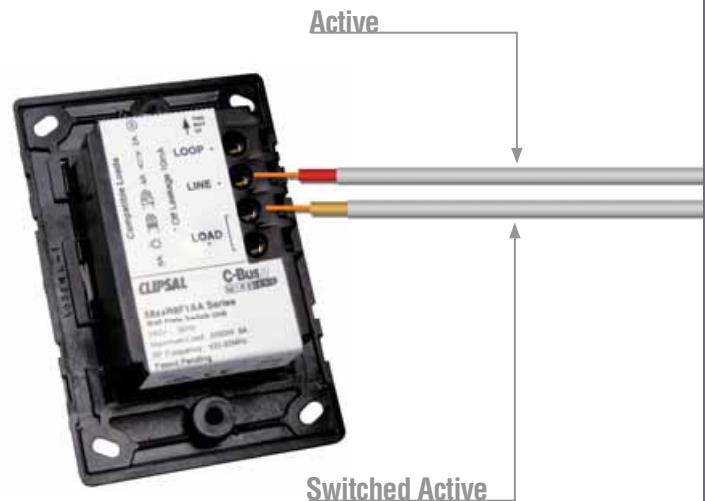

C-Bus Wireless wall switches talk to each other like your garage door opener or car's keyless entry. They have built in dimmers or timers, can do two-way, three-way switching (or more), can turn on appliances, dim lamps and can even be operated by remote control. And remember, they use the same 240V wires as a normal light switch. You don't even need a computer to set them up.

## Normal light switch

## C-Bus Wireless wall switch

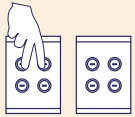

**NO NEUTRAL REQUIRED!**

# Getting started

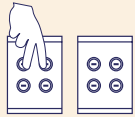

## Get your switches talking

### Step 1

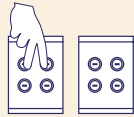

Press & hold top two buttons on first switch for 10 sec until they flash alternately.

### Step 2

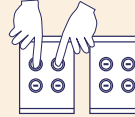

Press & hold top two buttons on next switch for 10 sec until they flash alternately.

do these within 5 sec

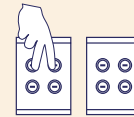

### Step 3

Press top two buttons again while they are still flashing rapidly.

### Step 4

Press & hold top left button and do two quick presses to top right button.

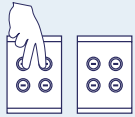

### Step 5

Press & hold top two buttons on either switch for 1 sec.

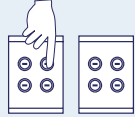

You're done!

## 2 way switching

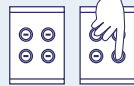

### Step 1

Press & hold the two buttons that are connected to the light you want to operate for 10 sec until they flash alternately.

### Step 2

Press the button that controls the light you want to operate. That light should now turn on.

### Step 3

Press the button on other switch that you want to control the light you have turned on.

### Step 4

Press & hold top two buttons on either switch for 1 sec.

You're done!

## Scenes

### Part 1 - Create your Scene button

### Step 1

Press & hold top two buttons for 10 sec until they flash alternately.

### Step 2

Double quick-press the button you want to control your scene.

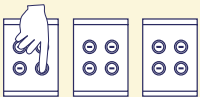

### Step 3

Press & hold top two buttons for 1 sec.

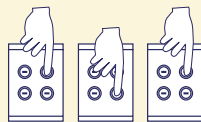

You're done!

### Part 2 - Creating your scene

### Step 1

Press & hold the scene button for 10 sec until it flashes.

### Step 2

Turn on any lights to the desired level for your scene. This may include plug adaptors with lamps.

### Step 3

Press the scene button for 2 sec.

You're done!

## Remote control

### Step 1

Press & hold top two buttons on any switch for 10 sec until they flash alternately.

### Step 2

Remove the remote back cover and slide switch to the "learn" position.

### Step 3

Press the button on the remote you want to control your light.

### Step 4

Press the button on the switch that you want to control with your remote.

### Step 5

Press & hold top two buttons for 1 sec.

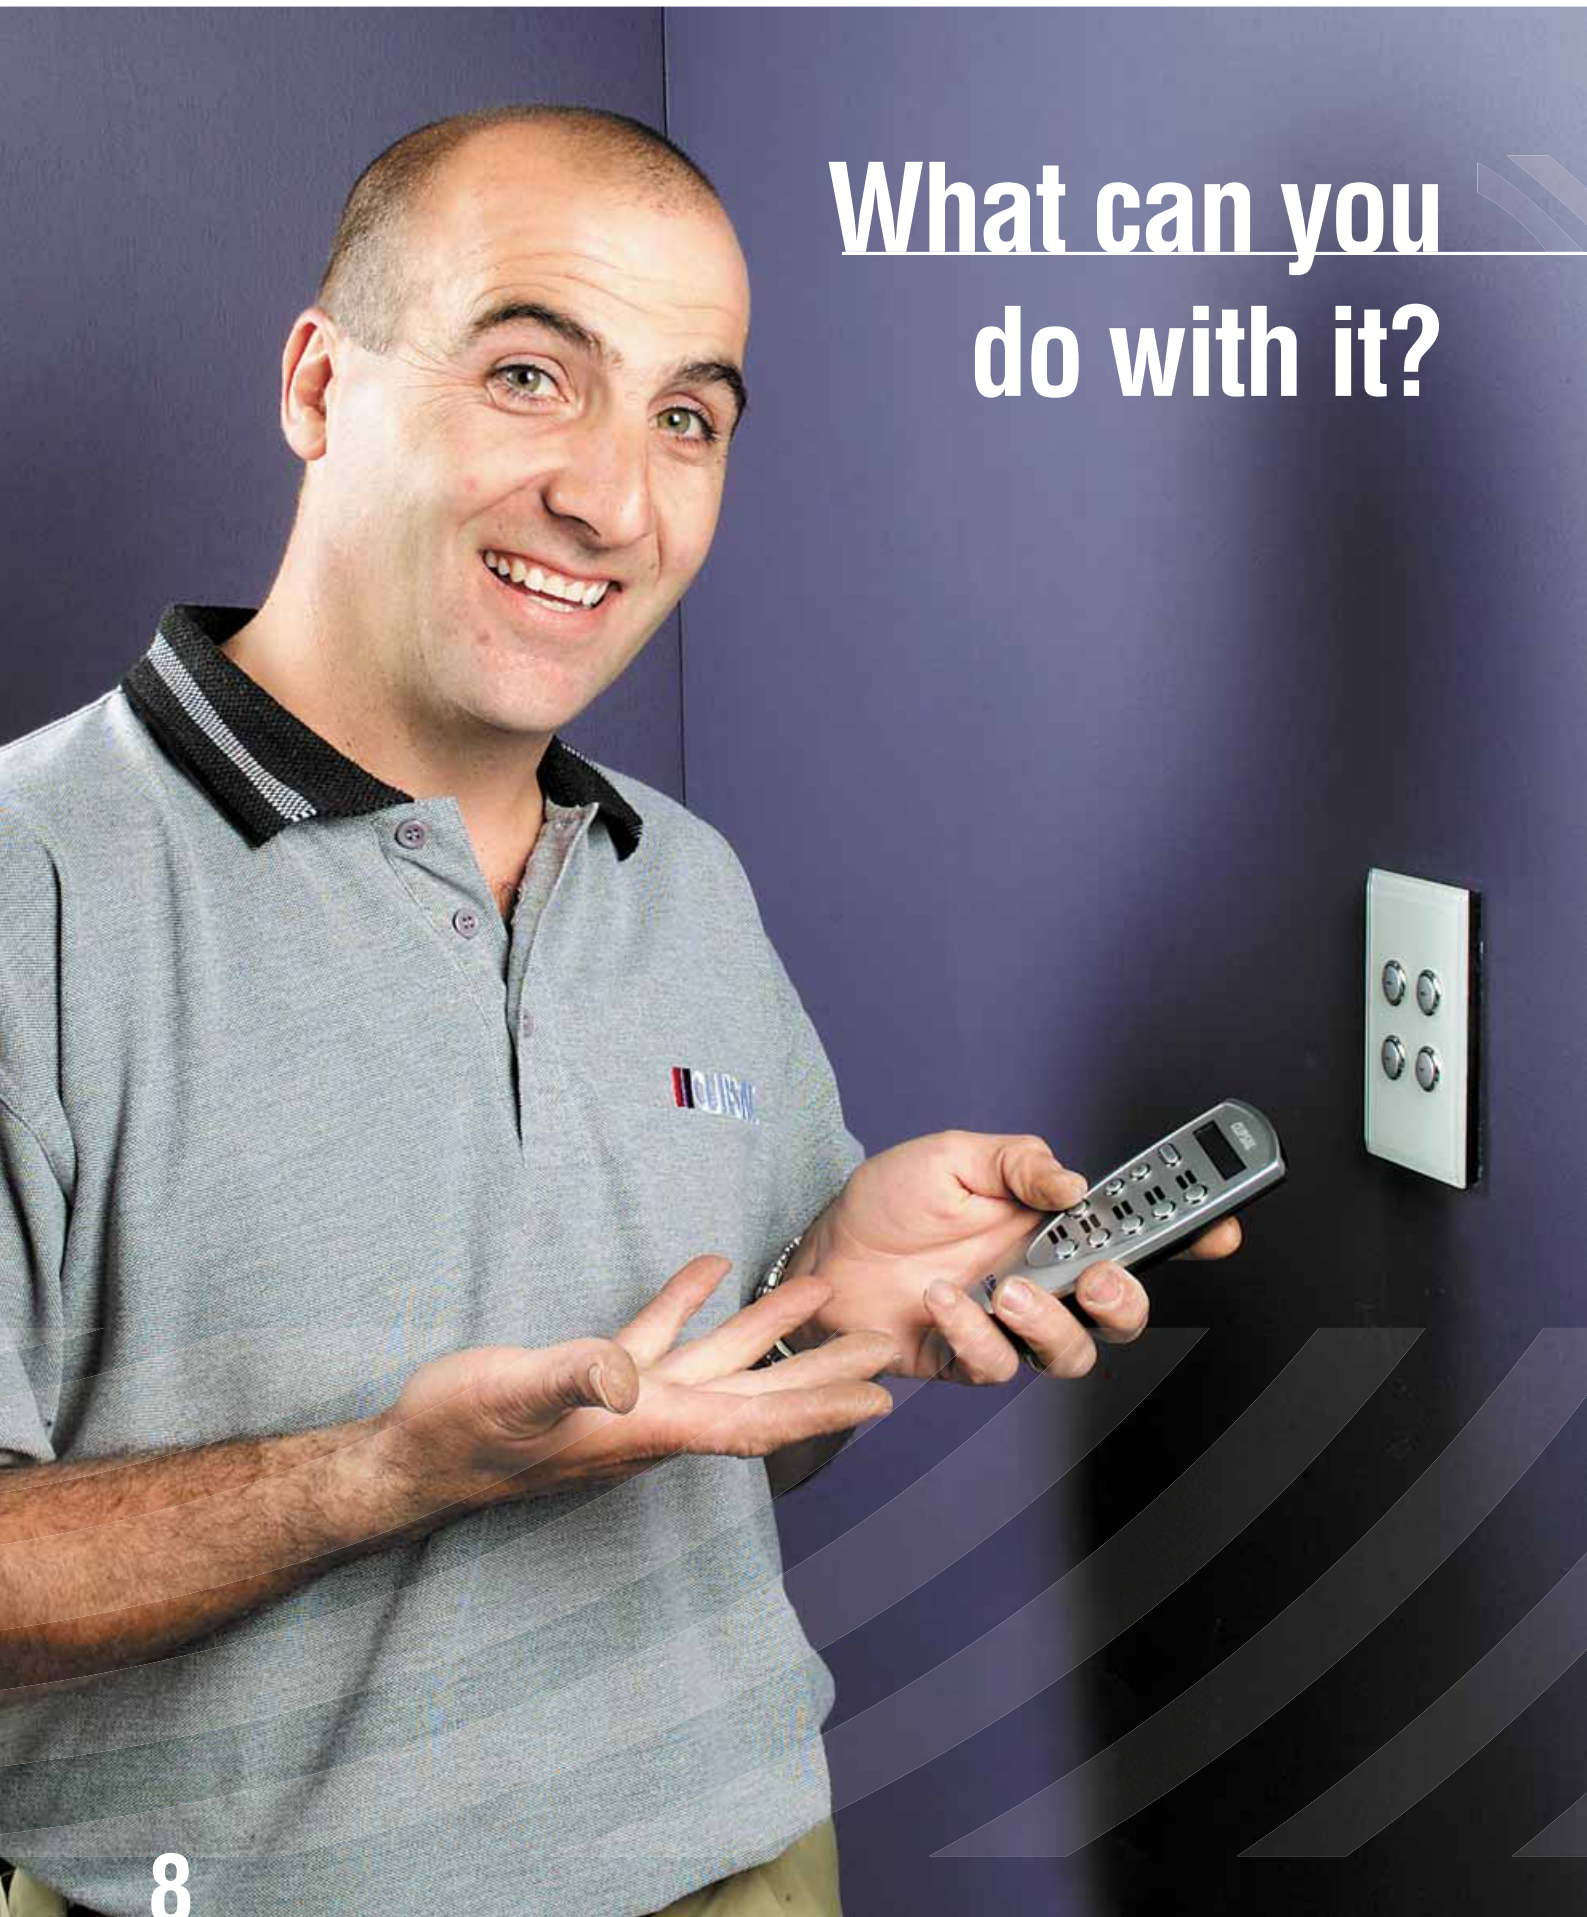

### Step 6

Slide switch to "use" mode and replace back cover.

You're done!

What can you  
do with it?

## C-Bus Wireless is the perfect solution for:

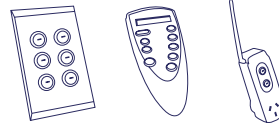

- home theatre room – a great place to introduce remote control of lights and lamps
- call-outs to replace existing switches – C-Bus Wireless offers built in two-way switching, dimmer and timer benefits
- existing homes or home renovations – update with the look of Neo and Ulti Saturn
- customers who feel more comfortable with traditional cabling – start with a single room
- those who want automation, but can't afford to do the whole home – add to the installation at any time
- existing C-Bus installations requiring remote control of appliances – a great new addition.

C-Bus Wireless is the perfect introduction to home automation.

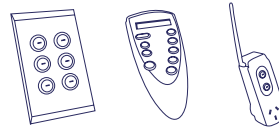

Provide a multitude of options for your customers using a combination of C-Bus Wireless products.

## ENTERTAINMENT

### Cinema Mode

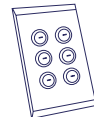

Recreate that cinema experience in your very own lounge room. Get comfortable as you sit down to watch a movie or play a DVD and adjust the lights to the exact level you want, all via remote control.

### Party Mode

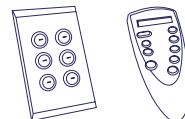

Friends over for dinner? Hit party mode and welcome guests with outdoor and entrance lighting, water features activated, and soft lighting at the dinner table.

## COMFORT

### Goodnight Mode

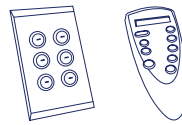

Get into bed and press the "All Off" button on your remote control and all your house lights and lamps will gently fade off. Once you've had this you'll wonder how you lived without it!

### Night time

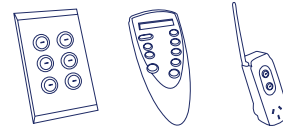

Need to check on the kids or visit the bathroom during the night? Create a dimly lit scene to light your way without disturbing family members.

## CONVENIENCE

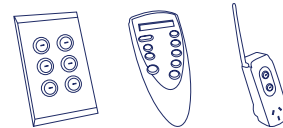

### 2-way and 3-way switching

Forget trenching walls and chasing extra cables. C-Bus Wireless switches can talk to each other from one side of the house to the other.

### Welcome home

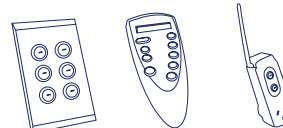

Turn on the kitchen, hallway and pathway lights with the press of one button.

### Spa baths, pool pumps and garden lights

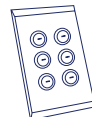

Turn on or off appliances inside and out via remote control from anywhere in the house.

## SECURITY

### Helping the elderly and disabled

Repetitive switching can be a difficult task for the elderly or disabled. C-Bus Wireless can be set-up to simplify these tasks from a single button or remote control.

### Panic Mode

Hear a strange noise? Hit "Panic Mode" and light up your whole house instantly. All external as well as internal lights will turn on to maximum brightness.
